02 Creativity

Dare to innovate creatively by diverging within an innovation continuum! Diversify your relationships and experiences, shift perspectives, and make space for reflective brainstorming.

01 Curiosity

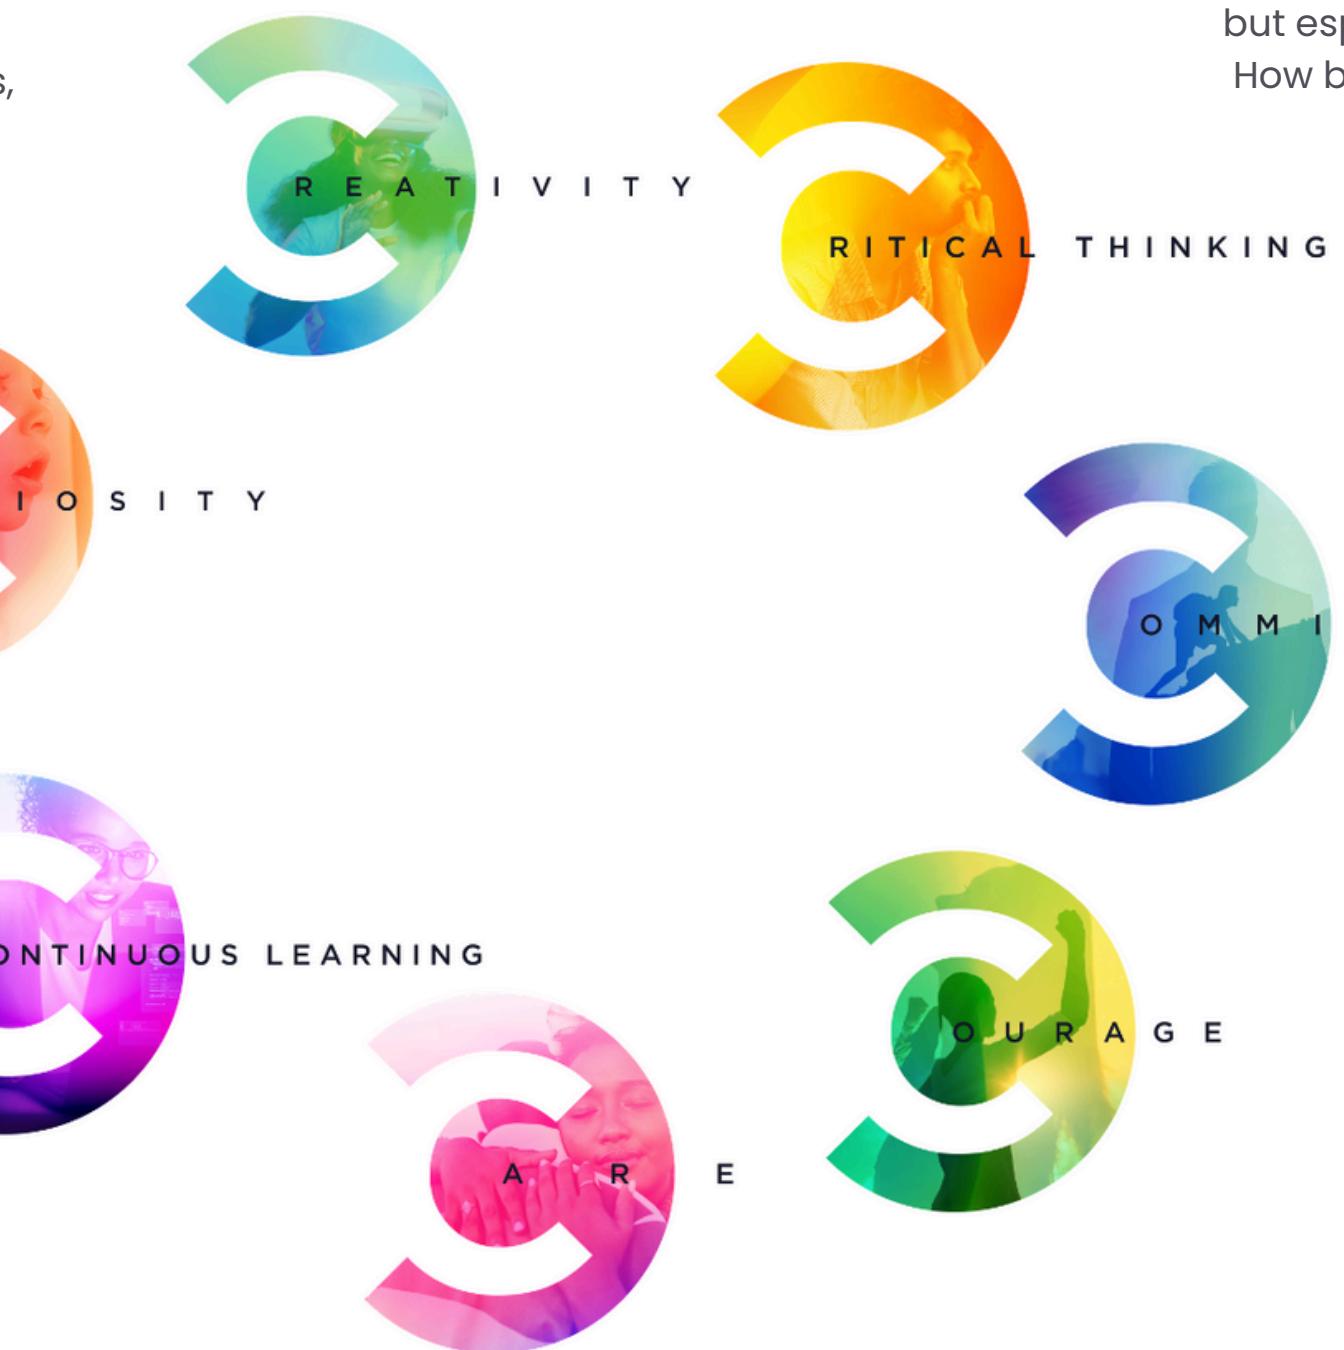

Stimulate curiosity as an antidote to the fear of the unknown, embrace not knowing, and ask questions like a scientist!

07 Continuous Learning

No matter how senior you are, you're never done. In a fast-paced world, lifelong learning is a top priority. Embrace and nourish the complexity of your brain!

06 Care

Taking care of others is morally right, but nowadays, more than ever, strategically essential! High performers understand that caring for employees and productivity go hand in hand.

Critical Thinking 03

Take a critical look at the world, but especially at your own brain! How biased are you, and do you fall prey to noise?

Commitment 04

Commitment is voluntary, but never optional. Negativity spreads like wildfire, but so does passion! Step out of your comfort zone and discover what you need to achieve your goals!

Courage 05

Courage is not the absence of fear, but the willingness to act despite it. Strengthen your courage, especially in times of uncertainty and amidst challenges!
